

HYDRAULIC ROCK BREAKERS

XL RANGE

(X)XL BREAKER

XS COST

Top performances for the best price.

GREEN BLOODED

Uncompromised Montabert quality.

FRENCH MADE

Designed and produced in France.

COMPLETE RANGE

Fitted for 10 to 40 tons carriers.

NITROGEN BECOMES AN ADVANTAGE

Nitrogen pressure stability is ensured by high performance seals. Unexpected and frequent nitrogen recharges will become a bad memory, and breaker performances will remain stable and constant over time. Moreover, nitrogen pressure can easily be adjusted depending on applications, to increase efficiency even further!

FULL PROTECTION

XL breakers, with their fully dampened power cell, will take care of both the excavator and the operator. Excavator boom and breaker housing are protected from cracks, and sound level are significantly lowered. On top of that, blank firing protection will improve wear parts lifespan, and the carrier hydraulic systems will be relieved from pressure spikes as the breaker can buffer them.

EASY MAINTENANCE

XL range has been designed to make maintenance an easy and simple task. Each breaker is supplied with a full set of tools, allowing to perform controls and basic maintenance conveniently.

XL GIFTED

Montabert know-how has been concentrated into these breakers: energy recovery system, reinforced housing, complete working tools range... a full set available as standard, for a very competitive offering.

HYDRAULIC ROCK BREAKERS
XL RANGE

DESIGNED & BUILT FOR A WIDE RANGE OF APPLICATIONS

DEMOLITION

CONSTRUCTION

EXCAVATION

RECYCLING

CIVIL ENGINEERING

GOT A JOB TO DO? WE HAVE THE RIGHT BREAKER FOR IT.

INTRA AND EXTRA-URBAN

Digging trenches, landscaping, demolishing buildings, quarrying... XL breakers are totally versatile and are up to the task for various jobsites and applications. Having the possibility to easily tweak nitrogen pressure is an extra asset which improves this versatility.

READY TO GO

No matter the workload, XL breakers are always up to the task. They can be used occasionally as well as intensively, depending on the jobsite needs. They can also tolerate various working environments, and tough climate and temperature conditions.

FULL THROTTLE

Breaker lubrication won't be an issue or a chore. Each breaker is supplied with an automatic lubrication system, mounted on the breaker itself or on the excavator. These pumps, designed by Montabert, will supply an optimal volume of grease and will help controlling lubricant consumption.

MONTABERT®

MONTABERT, ENGINEERING & INNOVATION SINCE 1921

The use of innovative high performance technology in product design and manufacturing makes Montabert products the most efficient and reliable choice for customers around the globe. Since 1921, Montabert products have been produced in France with a commitment to designing methods and solutions focused on productivity, reliability and safety. A continuous investment in research and development has resulted in the delivery of technology products that will revolutionize the market. For almost 100 years, Montabert products have led the industry with three to five patents a year. With a network of 150 dealers around the world, you will always find a Montabert certified partner close to you to provide the best service and solutions.
